

Chapter 1 The Science of Biology

Section 1-1 What Is Science? (pages 3-7)

This section explains what the goal of science is and describes a scientific view of the world.

What Science Is and Is Not (page 3)

1. What is the goal of science? _____

2. What is science? _____

Thinking Like a Scientist (page 4)

3. What is observation? _____

4. The information gathered from observation is called _____.
5. Complete the table about types of data.

TYPES OF DATA

Type	Data Involves . . .	Example
	Numbers	
	Characteristics that cannot be easily measured or counted	

6. What is an inference? _____

Explaining and Interpreting Evidence (page 5)

7. What is a hypothesis? _____

8. In science, a hypothesis is useful only if it can be _____.
9. Is the following sentence true or false? A hypothesis should be stated in such a way that it can never be proved wrong. _____

Chapter 1, The Science of Biology *(continued)*

10. What are three ways from which hypotheses may arise?
- a. _____
 - b. _____
 - c. _____
11. Circle the letter of each of the following that may be an outcome of testing a hypothesis:
- a. The hypothesis is partly true but needs to be revised.
 - b. The hypothesis is wrong.
 - c. The hypothesis is supported.
 - d. The hypothesis is of no value.

Science as a Way of Knowing *(page 6)*

12. What do scientists assume about the universe?
- _____
- _____

13. What are some qualities that are desirable in a scientist? _____
- _____
- _____

Science and Human Values *(page 7)*

14. Is the following sentence true or false? A community must use its shared values to make decisions about scientific issues. _____
